

SemBeacon: A Semantic Proximity Beacon Solution for Discovering and Detecting the Position of Physical Things

Maxim Van de Wynckel, Beat Signer

Web & Information Systems Engineering Lab
Vrije Universiteit Brussel

WEB & INFORMATION
SYSTEMS ENGINEERING

Overview

S

*"A Physical Thing is an abstraction of a **physical** entity that provides **interactions** to and participates in the Web of Things"*

- W3C Web of Things (WoT) Thing Description 1.1

Problem Statement

"How to discover and track Physical Things indoors?"

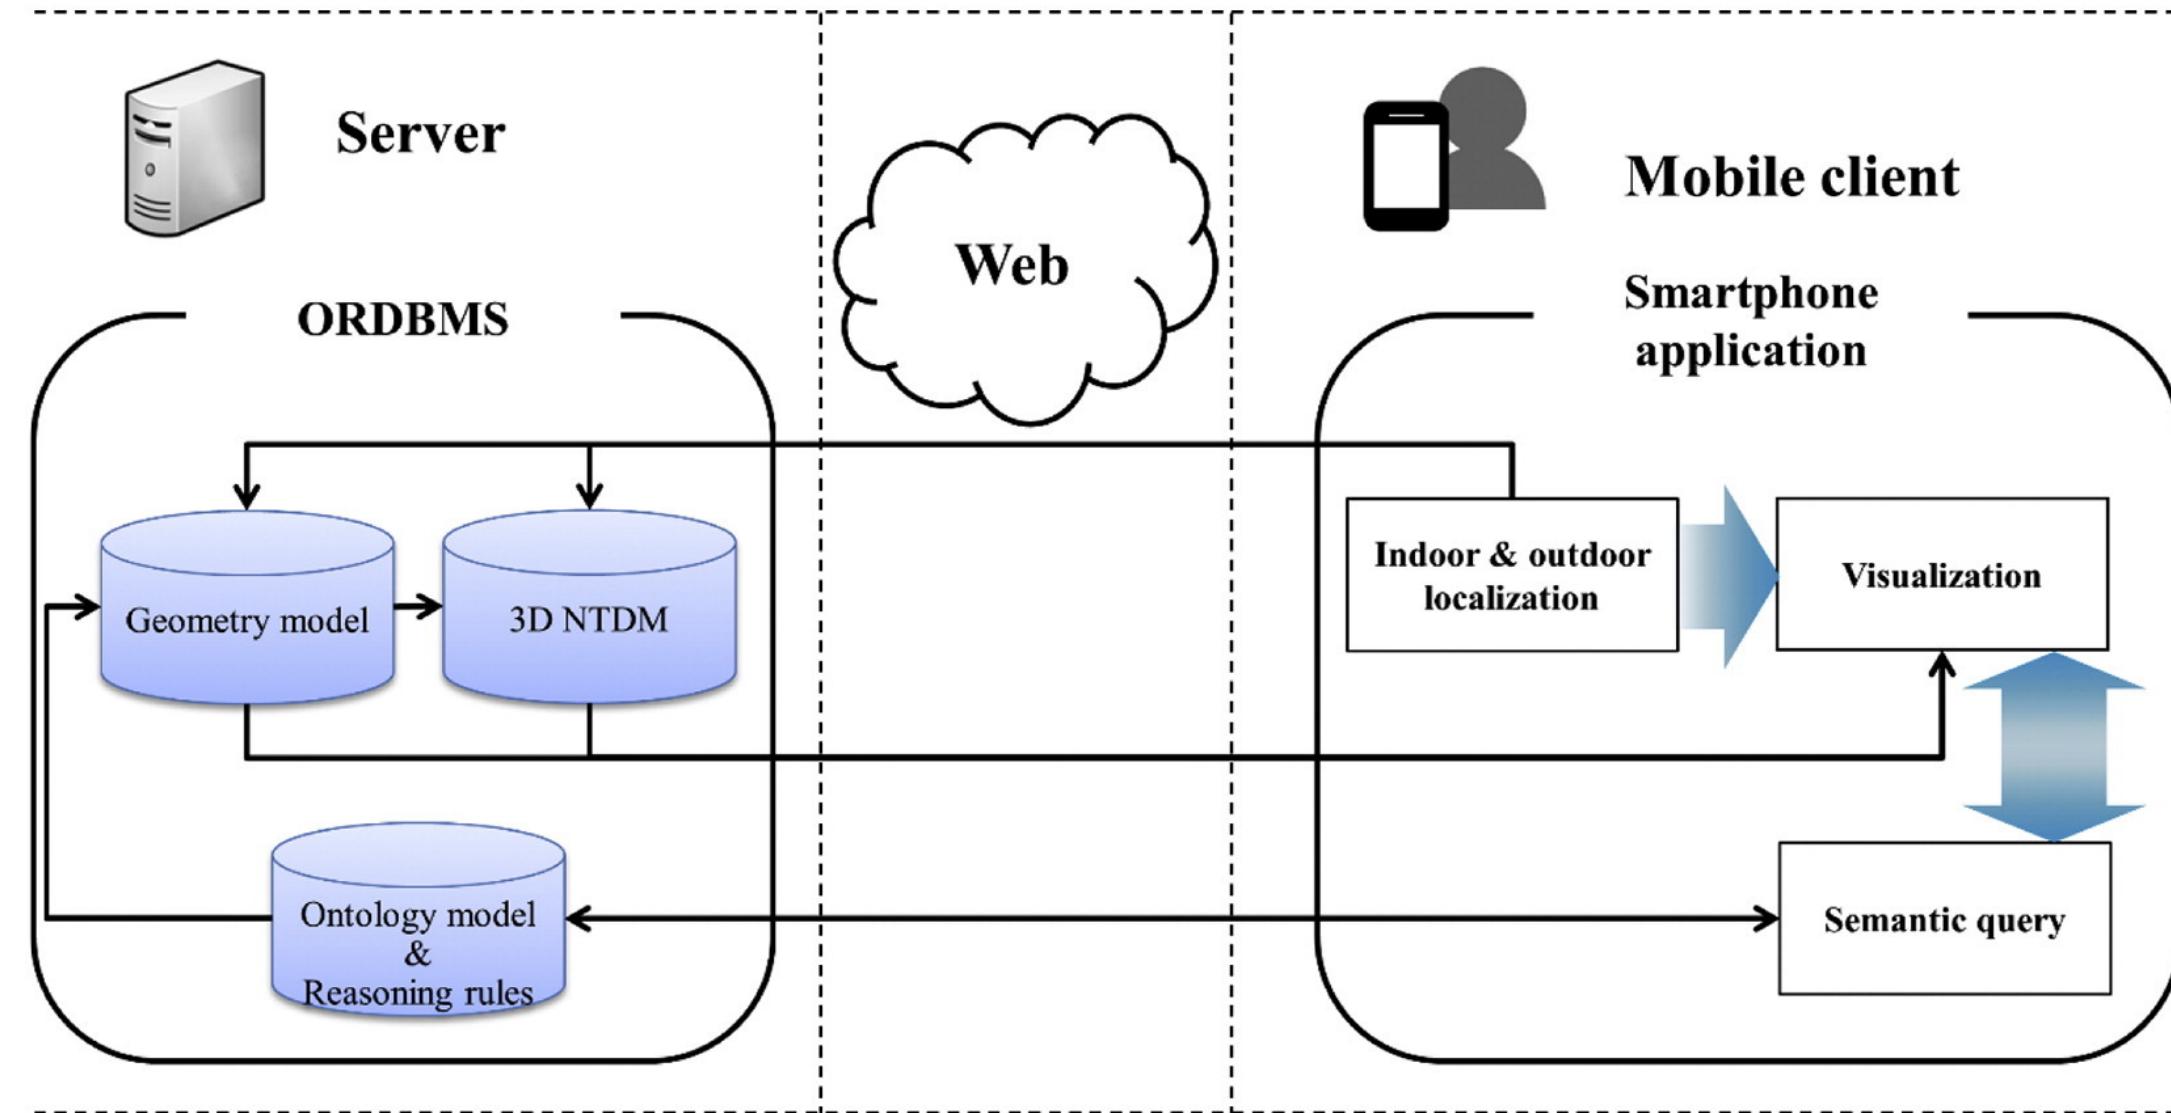

"How to provide context to Physical Things?"

"How to get this context to the user?"

Related Work

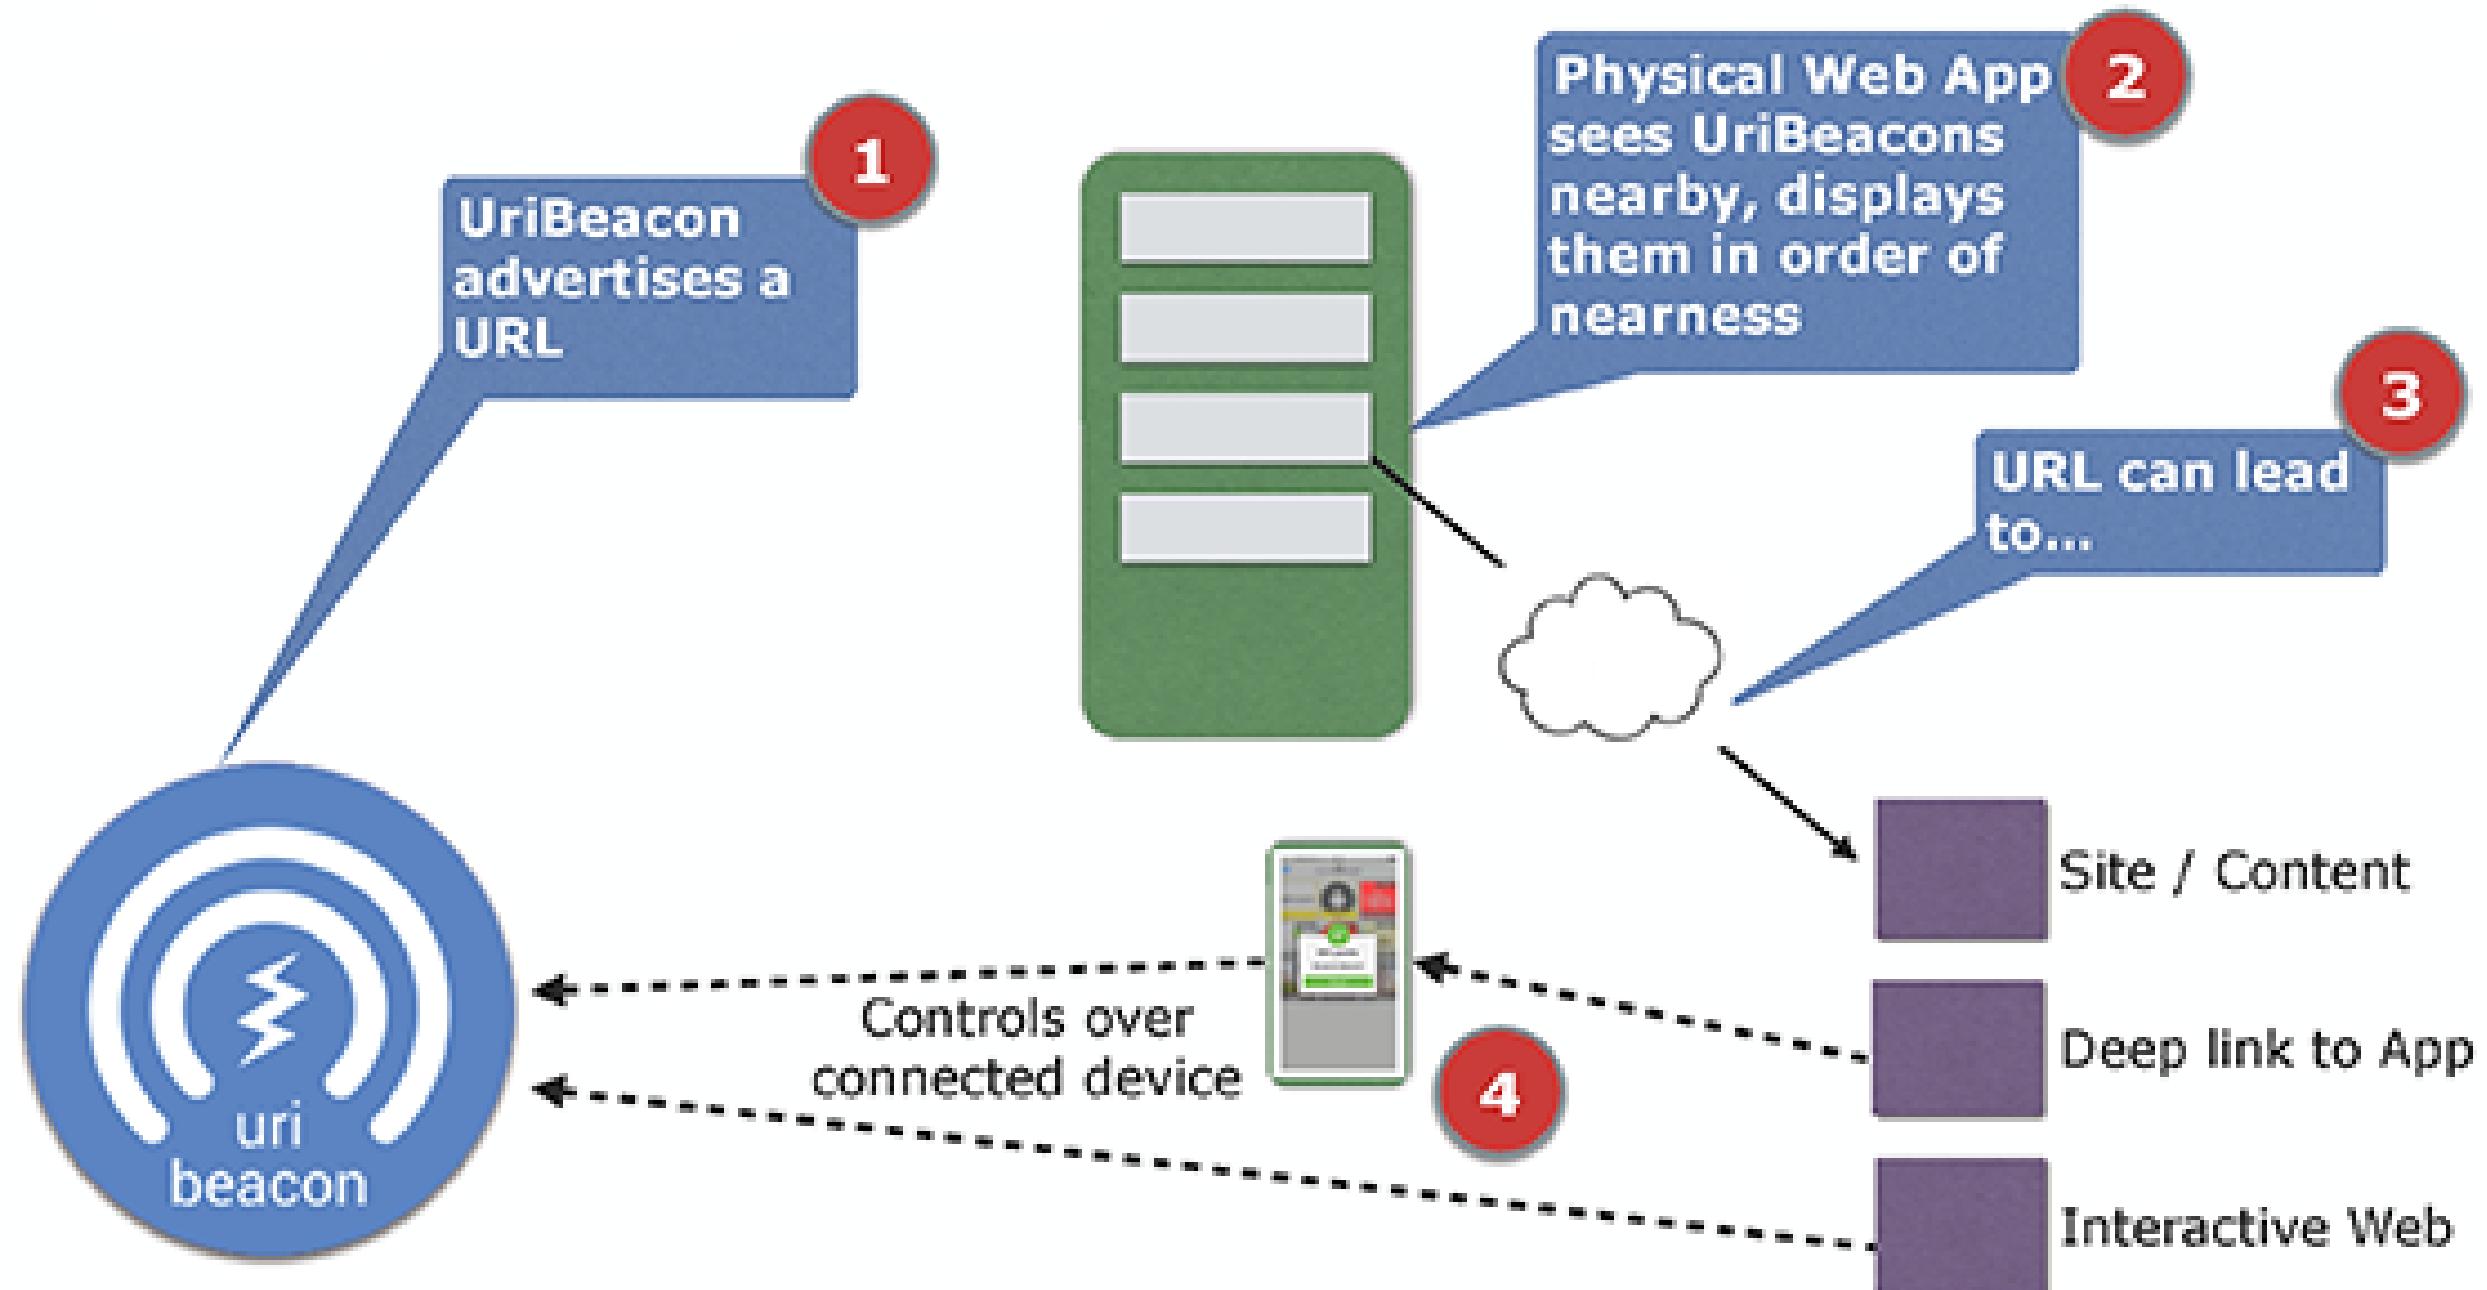

- HP CoolTown Beacon (2000) [26]

- Location-based service using ontology-based semantic queries (2017) [18]

SemBeacon > Bluetooth Specification

S

Flags

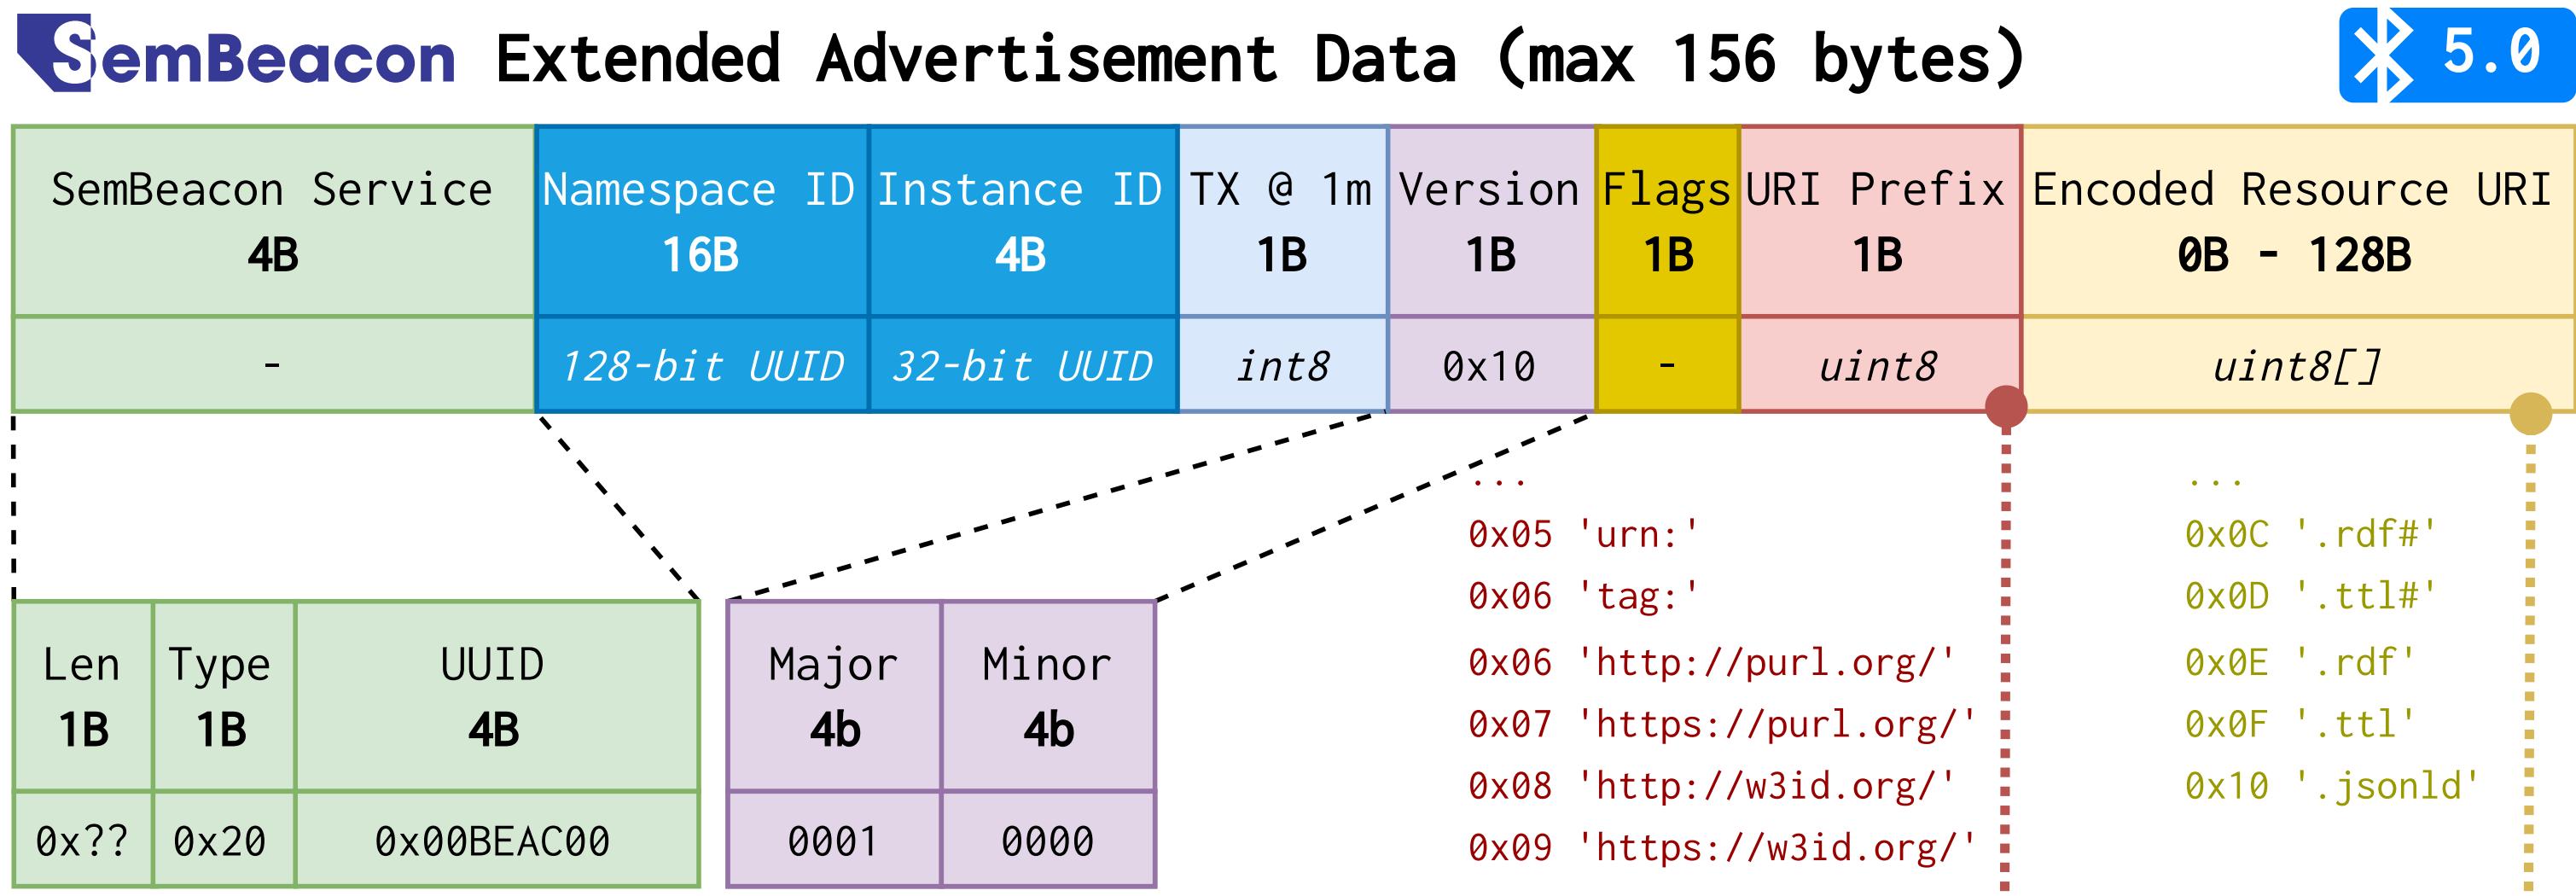

Based on UriBeacon, Bluetooth IPS and Eddystone frames

Bit (MSB)	Description	Example
0	Indicates if the beacon has a position.	0 = Unsure, 1 = Yes
1	Indicates if the beacon is private.	0 = Public, 1 = Private
2	Indicates if the beacon is attached to a moving object.	0 = No, 1 = Yes
3	Indicates if the beacon has a positioning system.	0 = No, 1 = Yes
4	Indicates if the beacon has telemetry data.	0 = No, 1 = Yes
5 - 7	<i>Reserved for future use.</i>

Demonstrator > Mobile Application

- ▶ **Scans and Simulates** SemBeacon, iBeacon, AltBeacon and Eddystone
- ▶ **Extracts** and visualises SemBeacon encoded information
- ▶ Implements HTTP **caching** and namespace mapping to environments

Supplemental Material

- ▶ Android Application to scan and broadcast SemBeacons
Created using Ionic Capacitor and @sembeacon/openhps
- ▶ Arduino ESP32 Library to advertise SemBeacon
Available in the Arduino IDE as "ESP32_SemBeacon"
- ▶ Android library extension to identify SemBeacons
Using the AltBeacon Beacon Library
- ▶ TypeScript library to create and detect SemBeacons
Using the OpenHPS framework (@sembeacon/openhps)

Conclusion and Future Work

- ▶ Semantic beacon solution called SemBeacon
- ▶ Describes beacons, environments and all devices within
- ▶ Backwards compatible, offline identification, scalable
- ▶ Expanding the vocabulary to facilitate device interactions
- ▶ Expanding to Solid Pods to enable the advertising of digital twins
